Skills

Frontend And Backend Development: HTML, CSS, React, Redux, Tailwind CSS, Node Js, Express, MongoDB, Mongoose, MySQL, REST API, Authentication, Authorization, Next Js

Programming Languages: JavaScript, Typescript, Java, Python

GenAI: LangChain, RAG, ChromaDB, Embeddings, LLM APIs, Prompt Engineering, AI Agents

Concepts: Object-Oriented Programming, Network Security, System Design (LLD, HLD), SDLC

Tools And Others: Git, GitHub, Docker, VS Code, Figma, Postman, IntelliJ IDEA, MySQL Workbench

Work Experience

Masai, Bangalore – Curriculum Engineer

May 2026 - Present

Tech Stack: MERN Stack, JavaScript, Python, Excel, Claude, Codex, AI Agents, Prompt Engineering, Data Pipelines

- Managed AI-enabled curriculum and assessment workflows across technical and non-technical programs, covering rubric-based evaluations, question validation, learner submission review, grading prompt refinement, evaluation quality checks, and learner support.
- Built MERN-based evaluation automation workflows and data pipelines using Claude, Codex, Gemini, and AI agents, collaborating with product, engineering, academic, and operations teams to track submissions, analyze grading issues, improve assessment delivery, maintain validation reports, prompt versions, and issue trackers, and ensure consistent AI-assisted evaluation outcomes.

Adda247 (C24/7, PreInsta), Bangalore – Executive - Audit & Assessment | **Experience Letter** April 2025 - May 2026

Tech Stack: React.js, Node.js, Express, MongoDB, JavaScript, Java, Computer Networks, Operating Systems.

- Built and optimized AI-powered rubric-based automated assessment evaluation system using MERN and Gemini 2.5 Flash Pro and the end-to-end assessment platform Optimus, improving evaluation accuracy by 80%, reducing manual effort by 70%, and enhancing learner insights by 30%.
- Designed, audited, and implemented end-to-end MERN-focused technical assessments while resolving learner doubts, increasing question relevance and improving overall learning outcomes by 20%.

Hudl, Bangalore – Sports Analyst | **Experience Letter**

June 2023 - November 2023

Tech Stack: SQL, Excel, Google Sheets, Hudl Platform, Data Cleaning, Data Validation, Data QA, Sports Analytics

- Processed and analyzed high-volume sports video datasets using Hudl tools, converting match events, player actions, tactical sequences, and performance indicators into structured analytical data for reporting and performance insights.
- Cleaned, transformed, and validated match-event datasets using SQL, Excel, and Google Sheets, performing data quality checks to identify tagging inconsistencies, correct classification errors, and maintain reliable datasets for downstream sports analytics.

Varcons Technologies, Bangalore – Web Development Intern | **Internship Certificate** February 2023 - March 2023

Tech Stack: React.js, Node.js, Express, MongoDB, JWT, REST API.

- Developed "Coursezz," an online course-selling platform, implementing JWT-based authentication and Role-Based Access Control (RBAC) to support secure multi-user access, reducing unauthorized access incidents.
- Optimized API performance by 40% through efficient Express middleware, caching strategies, and robust request validation, significantly enhancing system scalability and throughput.

Projects

CloudWatch | AI-powered Digital Marketplace | **Live Demo:** www.cloudwatch.in

February 2026

Tech Stack : Next.js 16, TypeScript, Node.js, Express, MongoDB, Razorpay, Gemini API, Cloudinary, StackBlitz

- Built an AI-powered digital marketplace using Next.js, TypeScript, Express.js, MongoDB, and role-based authentication, enabling creators to list, manage, and sell digital products while reducing product upload time by 45% and improving workflow efficiency by 30%.
- Integrated Gemini API, Firecrawl, SerpAPI, Razorpay, StackBlitz, and Cloudinary to automate product listing generation, competitor analysis, pricing insights, SEO optimization, live previews, media management, and real-time sales tracking, reducing manual listing effort by 60% and improving SEO efficiency by 40%

BuildingBlocks | Learning Management System | **Live Demo:** www.bbblocks.cloud

January 2025

Tech Stack : Node.js, Express.js, MongoDB, React.js, PayPal, Cloudinary, Shadcn UI, Tailwind CSS, Vercel

- Built and deployed a full-scale LMS with role-based dashboards, course creation, and video management features with custom controls and real-time tracking, improving course management efficiency by 40%, reducing upload time by 60%,

and increasing learner engagement by 20% .

- Integrated PayPal payment gateway and configured custom domain deployment, enabling secure transactions and improving payment success rate by 25%.

Cubekit | Hiring Platform | Live Demo: www.cubekit.vercel.app

August 2024

Tech Stack : React.js, Tailwind CSS, Shadcn UI, Supabase, Clerk, React Hook Form, Zod, EmailJS, Vercel

- Built Cubekit, a hiring platform using React.js, Supabase, and Clerk for authentication and role-based dashboards.
- Implemented validated job posting and application workflows (React Hook Form + Zod), location-based filtering API, resume uploads, status tracking, and automated EmailJS notifications, reducing job posting time by 40% .

Education

BMS Institute of Technology and Management

October 2018 - May 2023

B.E. in Electronics and Communication Engineering

Relevant Coursework: Data Structures and Algorithms, Database Management System, Operating System, Computer Network
